Dear Joshua,

You told me once you had somewhere a bibliography of early work on liver regeneration. If it is handy, I would greatly appreciate your sending it to me so that I can copy and return it. Specifically, we are interested to know if there were any early experiments of the type done by Friedrich-Freksa and Zaki.

Do you have any opinion as to the relative merits of working in Kornberg's Dept. at Wash. U. St. Louis vs. Michigan? This alternative has now presented itself to me.

Sincerely,

Alan
